### DETAILED ACTION

This Office Action is in response to Amendment filed 12/15/04.

#### *Allowable Subject Matter*

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious the instant combination in a slider of a thin-film magnetic head, comprising a medium facing surface that faces toward the recording medium, a substrate having a first surface that faces toward the recording medium and is located farther from the recording medium than the medium facing surface; and a second surface that meets the first surface; a thin-film magnetic head element located near the second surface and near the medium facing surface; an insulating portion surrounding the thin-film magnetic head element and having a surface that constitutes a part of the medium facing surface; and a medium facing layer located adjacent to the first surface of the substrate and having a surface that constitutes another part of the medium facing surface; wherein the first surface of the substrate is located farther from the recording medium than the surface of the insulating portion that constitutes the part of the medium facing surface when the medium facing surface is parallel to the recording medium; and the medium facing layer does not cover the surface of the insulating portion that constitutes the part of the medium facing surface, the substrate has a hardness greater than that of the insulating portion, and as the substrate and the

medium facing layer are compared in hardness, the medium facing layer has a hardness closer to that of the insulating portion as set forth in claim 1 and figure 12 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
